WOOD DESIGN

APPLICATION BROCHURE

Build on us.

Feel the warmth & comfort in your interiors

Wood-look ceilings have a remarkable ability to infuse any space with a sense of warmth and comfort, enhancing the well-being of both occupants and end users. The natural tones and textures of wood evoke a feeling of cosiness and familiarity, creating a welcoming atmosphere that envelops those within. Whether it's the rich hues of American Walnut or the earthy warmth of Oak, these ceilings exude a timeless charm that adds a layer of comfort to any room.

Beyond their visual appeal, wood-look ceilings also have a tangible effect on the well-being of individuals: the exposure to natural material like wood can help reduce stress levels and promote a sense of calmness and relaxation. This connection to nature is essential for fostering a healthy and harmonious environment, where individuals can thrive and flourish.

The natural tones and textures of wood evoke a connection to the outdoors, bringing a touch of nature indoors. From cosy living rooms to inviting cafes, wood-look ceilings lend a comforting backdrop to everyday moments, enriching the lives of those who dwell beneath them.

Design spaces

Wood-look ceilings possess a distinctive quality that elevates the signature spaces they grace, offering a diverse portfolio of design possibilities that inspire creativity and elegance. Whether in a premium office lobby, a chic restaurant, or a grand hotel, these ceilings become focal points, exuding sophistication and charm.

From classic wood veneers to contemporary finishes, the range of styles allows for tailored design solutions that complement any architectural vision. The versatility of wood-look materials extends beyond aesthetics, offering practical benefits such as acoustic insulation and environmental sustainability.

By seamlessly integrating into various design schemes, ceilings from the Knauf Ceiling Solutions Wood Design range not only enhance the visual appeal of signature spaces but also contribute to their unique ambiance and character, leaving a lasting impression on all who experience them.

Our solutions

DESIGNBOARD Wood
is a real natural wood veneered surface with a gypsum baseboard.

DESIGNLINE Wood
is a veneered gypsum fibre lamella.

Wood ceilings combine the beauty of natural wood in a versatile range of panels available in standard and custom options.

Concealed solutions provide a continuous, monolithic appearance by covering the suspension system.

Baffle and Grille solutions create dramatic lines adding a unique perspective to your design.

Open up an almost endless range of dramatic design possibilities with canopies that can be suspended from any soffit.

Create a jointless ceiling for a unique effect with a versatile range of channelled planks available in standard and custom options.

Easy-to-install wood veneer planks offer a wide variety of installation options including seamless wall to ceiling transitions.

Wall systems are available in a large range of finishes with standard, custom and channelled perforations that improve sound quality and reverberation time.

KNAUF DESIGNBOARD 227 / 230 WOOD

DESIGNBOARD 227 / 230 WOOD, made of gypsum fiberboard, is used in all areas of high-quality interior design with very exacting design requirements. The embellished surfaces of DESIGNBOARD 227 / 230 WOOD enable individual designs to be achieved, meaning that tomorrow's requirements can be met today.

Acoustic protection, acoustic properties, fire protection as well as robustness are requirements met by DESIGNBOARD 230 WOOD in correspondingly tested systems alongside very great flexibility in design. Excellently suited to use in areas subject to building regulations in which non-flammable composite materials are required. DESIGNBOARD 227 / 230 WOOD can be installed using our KEILLEISTE or DESIGNBOARD FIX substructures.

KNAUF DESIGNLINE WOOD

Knauf Design lamella system – the must-have for design fans. Modern decorative mouldings made of wood or with a wood look are already very popular all over the world. KNAUF DESIGNLINE, the new veneered gypsum fibre lamella from Knauf Design, is the ideal solution for exclusive and sophisticated interior design. In addition to its unique design, the new system offers maximum safety combined with a pleasant feeling of well-being. In contrast to conventional wooden lamellas, KNAUF DESIGNLINE is perfectly suited for use in areas regulated by building authorities where non-combustible composite materials are required.

The installation of the system also achieves optimum room acoustics. Different veneers, shapes and dimensions as well as the option to combine them with each other offer enormous design freedom. Installation is also possible both horizontally and vertically.

Thanks to the certified DESIGNLINE FIX substructure for walls and ceilings, KNAUF DESIGNLINE can be installed quickly and easily. This contributes to a sophisticated system solution.

Metal Wood Effect

When the advantageous properties of two material worlds are combined in style, a truly unique design solution emerges: Ceilings with Metal Wood Effect from Knauf Ceiling Solutions. Through a high-quality printing process, the metal elements are given a specific wood finish, authentically reproducing the natural appearance of wood. Various wood veneers such as oak, ash, walnut, or maple are available. The Metal Wood Effect solutions benefit from the inherent, proven features of our metal range for ceiling and wall installation – durability, stability, edge detail, and a variety of perforations – to harmoniously blend with the distinctive beauty of wood.
